STANDARD FEATURES

Aesthetics

- **Stainless Steel Escutcheons** - Corrosion-resistant fixture covers add an elegant, glimmering accent.

Green Technology

- **ArcticPac Insulation** - This double-layered insulation system features a reflective sheet of bubble-foil lining the inside of the cabinet, combined with a coat of Icynene™ foam that adheres to the spa's shell and hose connectors. The ArcticPac Insulation retains heat, keeping the spa energy efficient and the water at a tropical temperature.
- **Maintenance-Free Cabinet** - Synthetic cabinets weigh less than wood, yet are more resilient and durable. Unlike wood, these cabinets will not crack, chip, warp or rot. They last longer than wood cabinets and, best of all, don't use trees.

Protecting your Spa

- **ABS Base** - ABS base is a sealing for the bottom of your spa. Unlike traditional spas that only use plywood, an ABS bottom will not rot and protects your spa from the elements and rodents.
- **Spa Cover** - The ASTM Deluxe safety cover helps insulate and protect your spa.
- **1 Year Warranty** - Life-time warranty on the shell, and a one-year warranty comes standard on parts, labor and plumbing. See manual for more information.

OPTIONAL UPGRADES

Green Technology

- **Ozone** - The ozone water treatment provides crystal clear spa water by killing bacteria with fewer harsh chemicals.
- **Full Foam** - Provides the most efficient heat retention rating available in any spa, and dramatically increases the spa's lifespan.
